

To children for joy

LUNA Progress playground specializes in the production of children's furniture and play equipment for everyone types of playgrounds. It was established as a limited liability company only in 2008, but it has been engaged in the production of game elements since 1993. During this period, the company has gained a lot of experience and has become one of the largest manufacturers and suppliers of playground equipment.

We currently offer a wide range of products, from basic elements to more complex game elements. It is possible to create a smaller and larger playground suitable for tighter city niches, to freer park spaces, to kindergartens, or as part of sports and gaming areas. Game elements are intended for children of preschool, younger and older school age. We also supply specially adapted game boards for children with disabilities.

The programs of our gaming attractions are designed as a variable system of playground elements made mainly of natural materials, complemented by quality metal parts and highly durable plastic, rubber, and laminate components.

Game elements are designed and manufactured to meet the criteria and requirements of the European and Czech safety standards ČSN EN 1176. In 2008, based on a successful audit, we received the certificate ČSN EN ISO 9001: 2001 and ČSN EN ISO 14001: 2005 for design, production, service, and installation of playgrounds and interior equipment. If necessary, do not hesitate to contact us.

MATERIAL, GUARANTEE, INSTALLATION

WOOD (used for poles, railings, stairs...)

- off-center ground logs in-depth impregnation treatment
- three-layer glued pine profiled prism in the depth impregnation treatment
- durable and resistant acacia lumber

METAL (used for anchoring feet, gripping handles, joints...)

- hot-dip galvanized or galvanized

PLYWOOD (used on fillings, climbing walls...)

- waterproof foiled birch plywood

PLAST (used for caps...)

- hardened plastic

PLAYTEC (used for swings, fillings...)

- hardened plastic

RUBBER (used for swing seats...)

- rubberized aluminum seat construction

POLYPROPYLENE (used on a rope)

- metal rope coated with polypropylene

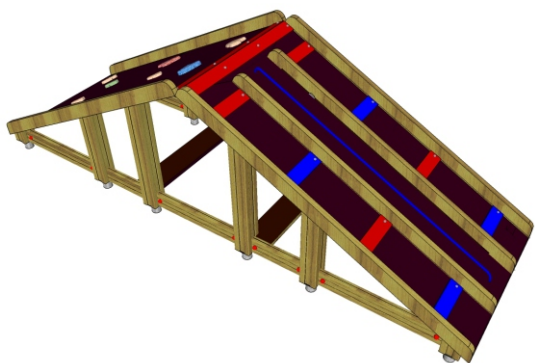

GUARANTEE

- warranty period 60 months

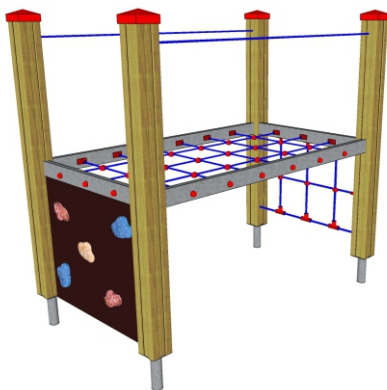

INSTALLATION

- transport, installation and assembly: our company will transport the ordered attractions to the place specified by the customer and professionally installs them. Possible own transport by the customer or his participation for assembly work is a matter of individual agreement. A delivery and warranty report is included in the delivery.
